

FIT-FOR-PURPOSE MUX AND UMBILICAL CLAMPS for Offshore and Onshore Applications

AFGlobal is an industry leader in the manufacture and sale of Mux and Umbilical Clamps for the offshore drilling market and subsea applications. Selling tens of thousands of clamps and spare parts to a variety of satisfied clients globally, since 1987.

Our products offer a vast array of standard and custom design clamps to fit your specific applications.

DESIGN

AFGlobal offers specialized clamp design and fabrication capabilities including a wide array of patented proprietary standard and custom clamps.

EXPERIENCE

We begin serving the offshore and onshore oil and gas industry in 1987. Since that time, clamps have always been a core business within our product portfolio.

RELIABILITY

With years of dependable service, AFGlobal clamps have become an industry standard for drilling risers helping to improve uptime and reduce drilling costs.

PERFORMANCE

Superior materials, a proven history of reliability including the harshest environments along with people who know your business, ensure the results you expect from an industry leader.

BUILT TO LAST—YOUR DESIGN OR OURS

Whether it's a standard or custom design, we begin with 316-grade stainless steel for optimal corrosion resistance in coastal and offshore environments.

AFGlobal produces a wide array of patented, proprietary and custom riser clamps for a majority of OEMs and first-tier suppliers in offshore and onshore drilling and production companies.

Our standard and custom clamp designs and fabrication capabilities enable us to meet customer's riser and subsea system requirements.

STANDARD CLAMPS

AFGlobal offers a broad selection of retractable and non-retractable Pod Hose clamps and MUX cable clamps. Clamp features include:

- Grip capacities up to 2,300 lbs.
- Solution anneal heat treating
- Slotted base plates for 4-inch to 7-inch auxiliary lines

Note: rubber inserts can be customized to most line or umbilical sizes. Call for details.

CUSTOM CLAMPS

AFGlobal's extensive experience and engineering expertise in clamps are built-to-order for your offshore and subsea applications. These custom clamps can be attached to any type of structure and include:

- Pod Hose clamps
- Derrick clamps
- MUX clamps

Bring your own design, modify one of AFGlobal's designs, or start from scratch—we build fit-for-purpose clamps for your applications.
